GUIDE FOR PROPOSERS

for the selection of additional contractors in an IST Integrated project

1. Introduction

1.1 Projects in the Sixth Framework programme

The participants in the consortium managing an Integrated project funded by the *Sixth Framework programme of the European Community for research, technological development and demonstration activities contributing to the creation of the European research area and to innovation (2002-2006)* can, during their initial contract negotiation with the Commission, reserve a portion of the project budget for specific tasks to be carried out by a new contractor or contractors which will join the consortium at a later date. These later-joining contractors are selected by means of competitive calls.

This Guide for Proposers contains the basic information needed to guide you in preparing a proposal to join an existing Integrated project. It shows examples of the proposal forms which comprise Part A of a proposal, and gives instructions on how to write Part B. Both parts are required to make a complete proposal¹. It also describes how the proposal should be submitted, and the criteria on which it will be evaluated.

A overview of what an Integrated project comprises and how such a project is implemented is found at

http://europa.eu.int/comm/research/fp6/instruments_en.html or at
<http://www.cordis.lu/fp6/instruments.htm>.

Conditions of participation and funding are those of the Sixth Framework programme, as defined principally in

Decision No. 1513/2002/EC of the European Parliament and the Council concerning the sixth framework programme for research, technological development and demonstration activities

Council decision 2002/834/EC adopting a specific programme for research, technological development and demonstration: "Integrating and strengthening the European Research Area" (2002-2006)

Regulation (EC) No 2321/2002 of the European Parliament and of the Council of 16 December 2002 concerning the rules for the participation of undertakings, research centres and universities in, and for the dissemination of research results for, the implementation of the European Community Sixth Framework Programme (2002-2006)

Other documents which you should consult during the preparation of your proposal are:

The call announcement. This text is prepared by the existing project. It describes in detail the tasks within the project which are open for proposals from additional partners, and gives the deadline and address for proposal submission.

¹ Incomplete proposals will be ineligible and therefore will not be evaluated.

The brochure “The 6th Framework Programme in Brief”. This brochure gives a brief overview of FP6. It serves as a guide for navigating through the activities, funding schemes, thematic areas, types of instrument etc.

The model contract and its annexes for Integrated projects. This specifies the contractual terms and conditions with the Commission, to which your organisation must agree if you are selected to join the project consortium.

The consortium agreement. This specifies the agreements made between the existing contractors concerning the management of this project.

All of the above documents may be found at <http://www.cordis.lu/fp6/find-doc.htm>, with the exception of the call announcement and the consortium agreement. Copies of these may be obtained from the existing project, at the postal address or the web page given in the call announcement.

The proposer which is selected to join the consortium will be required to complete the Form B which is annexed to the contract and its attachments, in order to accede to the contract. They will also be required to sign the pre-existing consortium agreement. Proposers are strongly recommended therefore to familiarise themselves with the model contract for Integrated projects and the consortium agreement for this project, before deciding whether they wish to proceed with a proposal.

This Guide for Proposers does not supersede the rules and conditions laid out, in particular, in Council and Parliament Decisions relevant to the Sixth Framework Programme, the Specific Programme, the Workprogramme for IST, the Call for proposals or the Guidelines on evaluation and selection of proposals.

1.2 Funding of participation

Participation as a contractor in an FP6 Integrated project is on a cost-shared basis, the Commission making a contribution to the total cost of the work:

- RTD and innovation related activities may receive a grant of up to 50% of eligible costs
- Dissemination activities may receive a grant of up to 35% of eligible costs
- Training activities may receive a grant of up to 100% of eligible costs
- Consortium management activities may receive a grant of up to 100% of eligible costs

The funding scheme is described in more detail in the documents referenced in Section I above.

Funding may be granted to any organisation or individual established in a Member States of the EU, or in a state associated with the Sixth Framework programme. The EU Member States are: Austria, Belgium, Bulgaria, Cyprus, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Ireland, Italy, Latvia, Lithuania, Luxembourg, Malta, Netherlands, Poland, Portugal, Romania, Slovakia, Slovenia, Spain, Sweden, United Kingdom. The states associated with the Sixth Framework programme are Iceland, Israel, Liechtenstein, Norway, Switzerland and Turkey.

International organisations of European interest¹, and the European Commission's Joint Research Centre (JRC) are considered on the same footing as legal entities established in an EU Member state.

Organisations from countries on FP6 INCO (International Cooperation) target list will be funded on the same basis as organisations from the EU². These include the countries of the former Soviet Union, the Western Balkans, the Mediterranean partner countries and developing countries elsewhere in the world. It includes Croatia, which is a candidate to join the European Union. (Potential participants should confirm the exact situation of all these countries at the FP6 International Cooperation website, see Section VII).

Organisations from certain other countries may also receive a Community financial contribution, as defined in the Rules of Participation in FP6.

¹ International organisations, the majority of whose members are European Union Member States or Associated States, and whose principal objective is to promote European scientific and technological co-operation

² Up to the limit of the amount of funding reserved for this action

2. How to prepare a proposal

2.1 One stage submission

Proposals for selection as an additional contractor in an IST Integrated project are submitted in a single stage, by submitting a complete proposal application which is prepared as described in this document.

Existing participants in the project may not respond to this call.

2.2 The structure of a proposal

A proposal has two parts. Full details about preparing these parts are annexed to this Guide.

- **Part A** is a set of forms which collect necessary administrative data about the proposal and the proposer e.g. proposer's name and address, brief description of the work, total funding requested by type of activity etc..
- **Part B** comprises a structure or list of headings which should be followed, rather than a pre-prepared form. It describes among other things the nature of the proposed work, the participant and his role in the project. A recommended/maximum length is specified for the different sections of Part B.

2.3 Proposal language

The proposal must be prepared in the working language of the project which you wish to join. This is identified in the Call announcement.

3. Submission of proposals

Proposals should be submitted on paper to the address given in the call announcement

Proposals must be received by the closing date of the call. Late proposals will not be evaluated.

3.1 Submission on paper

Proposal Part A –You should use the forms annexed to this Guide.

Proposal Part B – Prepare a text document following the outline supplied as an annex to this Guide.

- each page of Part B **must** be numbered (preferably in the format “page X of Y”).
- each page of Part B **must** be headed with the acronym of the project making the call.

Your proposal should be submitted as five complete copies, bound and printed single-sided. Print your proposal on white A4 paper, 80 g/m²

You are strongly advised to securely retain an additional complete copy of your proposal.

3.3 Multiple submissions

Proposer may submit more than one version of their proposal, for example if an error is discovered and you wish to send a corrected version before the call closes. If multiple versions are submitted, the one which was last to arrive before the close of call will be evaluated.

3.4 Deadline for reception

Proposers are reminded that it is their own responsibility to ensure the timely submission of their proposal.

Proposals must be received before the deadline **at the address specified in the call**. If you send or deliver your proposal to any other address, its time of receipt is still based on its time of arrival at the address specified in the call. There is a high probability it will not reach that address in time.

3.5 Acknowledgement of receipt

As soon as possible after the close of call, an Acknowledgment of receipt will be mailed to you. The sending of an Acknowledgement of receipt does not imply that a proposal has been accepted as eligible for evaluation.

4. Proposal evaluation and selection

The consortium will evaluate proposals received in the light of the criteria that governed the Commission's original evaluation and selection of their project, using the attached forms and with the assistance of at least two experts who are independent of any member of the consortium and of any proposer. The experts will be individuals from the fields of science, industry and/or with experience in the field of innovation and also with the highest level of knowledge, and who are internationally recognised authorities in the relevant specialist area.

Each independent expert will record his/her individual opinion of each proposal on the attached "individual" evaluation forms. They will then meet or communicate together to prepare a "consensus" form for each proposal. Using the scores given on the consensus form, the consortium will normally select the highest scoring proposal.

However, the consortium is not obliged to select the highest scoring proposal where it has objective grounds for objecting to the participant, for example commercial competition. In this case the choice may pass to the next-ranked proposal.

Also the consortium may conclude that even the highest scoring proposal is of inadequate quality, in which case it will make no selection. In the event of no selection being made, the consortium may or may not re-open the call at a later date.

5. Proposer checklist

For submission of your proposal you must check the following:

- ⇐ Have you completed both a Part A and a Part B ?
- ⇐ Is each page of your proposal headed with the proposal acronym
- ⇐ Is each of the pages numbered (page X of Y) ?
- ⇐ Is your proposal prepared as five complete bound single-sided paper copy (plus one additional copy for you to hold in reserve) ?
- ⇐ Are the copies of your proposal complete, with no pages missing?
- ⇐ Is the complete set of proposal documentation placed in a package, correctly addressed using the address given in the call announcement ?
- ⇐ Last but not least, have you made all possible arrangements to ensure that the proposal arrives before the deadline ?

6. Support to proposers

6.1 Information Desk for the call

The address from where you can get further information on the call is:

[Name]
[Address]

email:
tel:
fax:

General support actions for the IST Priority are also available to proposers in the competitive calls for additional partners in existing projects.

6.2 IST Information Desk

The address of the IST Priority Information Desk is:

European Commission
The IST Information Desk
Directorate General Information Society
BU31 01/19
B-1049 Bruxelles/Brussel

email: ist@cec.eu.int
tel: +322 296 8596
fax: +32 2 296 8388

The Information Desk operates 09h00 - 17h00 (Brussels time), Monday to Friday.

6.3 National Contact Points

The IST Priority supports a network of National Contact Points (NCPs), which can be helpful to organisations from their country both in general advice and particularly on preparing proposals. Organisations should contact the NCP of their own country for further information (see Section 7).

6.4 The Intellectual Property Rights Helpdesk

The IPR-Helpdesk has as its main objective to assist potential and current contractors taking part in Community funded projects on Intellectual Property Rights issues, and in particular on Community diffusion and protection rules and issues relating to IPR in international projects. Another objective is to raise awareness in the European research community on IPR issues, emphasising their European dimension.

It operates a free helpline offering a first line assistance on IPR related issues. The helpline is run in English, French, Italian, German and Spanish.

fax +34 96 590 97 15

6.5 ETI actions

As part of the special support for SME participation in European research activities, the Sixth Framework Programme funds a range of Economic and Technological Intelligence (ETI) projects. The goal of these projects is to facilitate the participation of SMEs in FP6 proposals. The existing ETI projects already cover most of the Priority Thematic Areas and are establishing extensive networks of SMEs, and thus they offer a unique source of information and contacts.

How to complete the proposal submission forms (Proposal Part A)

Introduction

This document provides guidance on how to complete the administrative forms. These forms will be an integral part (the Part A) of your proposal for an Integrated Project.

How to complete the forms

These forms are designed for general use within the programme, which is normally for proposing consortia. As a solo participant, you will need to complete:

- An A1 form, which identifies and summarises your proposal
- An A2 form, giving your name and address details etc. You are partner no. 1
- An A3 form, indicating your foreseen costs and the requested funding per activity type. In this form you need to complete only one line, as you are a solo participant.

For numbers, (amount, duration, etc.), please round to the nearest whole number. Do not insert any character or space to separate the digits in a number. Please remember to indicate the project short name (acronym) in all sheets of the forms where indicated, and on every page of the other parts, including any annexes. All costs must be given in €(not thousands of €) and must exclude value-added tax (VAT).

If completing the forms on paper, enter your data only in the white space on the forms, and do not type outside the boundaries. For questions requiring a choice between different boxes, please enter X in the appropriate space.

1 Proposal number

The proposal number will be assigned on submission. Please leave the field empty.

2 Proposal Acronym

Insert the acronym of the project you wish to join.

The same acronym should appear on each page of the proposal (part A and part B)

3 Proposal Title

Insert the title of the project you wish to join.

4 Duration

Insert the estimated duration of your participation in the project in full months.

5 Call (part) Identifier

Insert the call identifier as given in the call announcement

6 Activity code(s) most relevant to your topic

Leave blank

7 Keyword codes from thesaurus

Leave blank

8 Free keywords

Leave blank

9 Abstract

You should not use more than 2000 characters. The abstract should, at a glance, provide the reader with a clear understanding of the objectives of the proposal and how the objectives will be achieved

and their relevance to the existing project. This summary will be used as the short description of the proposal in the evaluation process and in communications to the programme management committees and other interested parties. It must therefore be short and precise and should not contain confidential information. Please use plain typed text, avoiding formulae and other special characters. If the proposal is written in a language other than English, please include an English version of the proposal abstract in Part B.

10 Previously submitted similar proposals or signed contracts

Leave blank

11 Organisation legal name

Official name of participant organisation. If applicable, name under which the participant is registered in the official trade registers.

12 Organisation short name

The short name chosen by the participant for this proposal. This should normally not be more than 20 characters and the same should be used for the participant in all documents relating to the proposal.

13 Address data

Fill in only the fields forming your complete postal address. If your address is specified by an indicator of location other than a street name and number, please insert this instead.

14 Country

Insert the name of the country as commonly used.

15 Activity Type

Please insert the abbreviation for the activity type most appropriate to the organisation (only one), according to the following explanations:

- **HE-Higher Education:** organisations only or mainly established for higher education/training, e. g. universities, colleges
- **RES-Research:** organisations only or mainly established for carrying out research activities
- **IND-Industry:** industrial organisations private and public, both manufacturing and industrial services – such as industrial software, design, control, repair, maintenance;
- **OTH-Others:** Organisations not fitting in one of the above categories

16 Legal status

Please insert only one abbreviation from the list below, according to the following explanations:

GOV: Governmental (local, regional or national public or governmental organisations e. g. libraries, hospitals, schools);

INO: International Organisation (i. e. an international organisation established by national governments);

JRC: Joint Research Centre (the Joint Research Centre of the European Community);

PUC: Public Commercial Organisation (i.e. commercial organisation established and owned by a public authority) ;

PRC: Private Commercial Organisation including Consultant (i.e. any commercial organisations owned by individuals either directly or by shares, physical persons);

EEIG: European Economic Interest Group;

PNP: Private Organisation, Non Profit (i.e. any privately owned non profit organisation).

17 Legal Status: If “EEIG”

If the organisation is a European Economic Interest Group you have to add a sheet to part B of the proposal listing the members of the group (legal names, addresses, dependencies). This is necessary to verify if the proposal meets the eligibility criterion of minimum partnership.

18 Legal Status: 'If 'PRC', Specify'

If you are a Private Commercial Organisation (PRC), please indicate the type of organisation (e.g.: SA, LTD, GmbH, physical person etc.).

19 Small or Medium Sized Enterprise (SME)

To be regarded as an SME, your organisation must have:

- less than 250 full time equivalent employees
- and**
- an annual turnover not exceeding EUR 40 million **or** an annual balance sheet total not exceeding EUR 27 million,
- and**
- must not be controlled by 25% or more by a company which is not an SME (on the issue of control, see note 20).

If all the above conditions apply to the organisation insert YES, else NO.

20 Dependencies between participants

Indicate any dependencies between your organisation and any other organisation already participating in the project. You may find the list of other organisations participating in the project at <http://www.cordis.lu/fp6/projects.htm>. Two participants (legal entities) are dependent on each other where there is a controlling relationship between them:

- A legal entity is under the same direct or indirect control as another legal entity,
- or
- A legal entity directly or indirectly controls another legal entity,
- or
- A legal entity is directly or indirectly controlled by another legal entity.

Control:

Legal entity A controls legal entity B if:

- A, directly or indirectly, holds more than 50% of the share capital or a majority of voting rights of the shareholders or associates of B,
- or
- A, directly or indirectly, holds in fact or in law the decision-making power in B

Direct or indirect holding of more than 50% of the nominal value of the issued share capital in a legal entity or a majority of voting rights of the shareholders or associates of the said entity by public investment corporations, institutional investors or venture-capital companies and funds shall not in itself constitute a controlling relationship.

Ownership or supervision of *legal entities* by the same *public body* shall not in itself give rise to a controlling relationship between them.

21 Character of dependence

Insert the appropriate abbreviation according to the list below to characterise the relation between your organisation and the other participant(s) you are related with:

- **SG:** Same group: if your organisation and the other participant are controlled by the same third party
- **CLS:** Controls: if your organisation controls the other participant
- **CLB:** Controlled by: if your organisation is controlled by the other participant

22 Person in charge

Please insert in this section the data of the main scientist or team leader in charge of the proposal for your organisation.

23 Title

Please choose one of the following: Prof., Dr., Mr., Ms.

24 Sex

This information is required for statistical purposes. Please indicate with an F for female or an M for male as appropriate.

25 Phone and fax numbers

Please insert the full numbers including country and city/area code. Example +32-2-2991111.

26 Participant number

You are participant no. 1

27 Requested grant to the budget and cost models

The **Community grant** requested for a proposal depends on the cost model applicable to each participant and on the costs for the different activities. At the proposal stage, costs and requested Community contribution have to be broken down by type of activity and by participant. There are no pre-defined cost categories. In establishing their budget participants should follow their own accounting rules.

Maximum contributions by activity type as percentage of the respective costs are as follows:

	Maximum grant as percentage of full costs (participants applying the FC or FCF model)	Maximum grant as percentage of additional costs (participants applying the AC model)
RTD activities (see note 28)	50%	100%
Demonstration activities (see note 29)	35%	100%
Innovation-related activities (see note 30)	50%	100%
Training activities (see note 31)	100%	100%
Consortium management activities (see note 32)	100% (up to a maximum percentage of 7% of the Community contribution)	100% (up to a maximum percentage of 7% of the Community contribution)

The **cost models** to be applied by the participants are:

- **FC:** a full-cost model in which all actual eligible direct and actual eligible indirect costs may be charged to the contract;
- **FCF:** a simplified variant of the full-cost model, in which all actual eligible direct costs may be charged to the contract, together with a flat rate for indirect costs. This flat rate is equal to 20% of all direct eligible costs minus the costs of subcontracts.;

- **AC**: an additional-cost model, covering all eligible direct costs that are additional to the recurring costs of a participant (with the exception of consortium management for which recurring costs would also be eligible), together with a flat rate for indirect costs. This flat rate is equal to 20% of all direct additional costs minus the costs of subcontracts.

Which cost model to use

Which cost model to use depends on the type of legal entity concerned and the accounting system:

Cost model	Who can use it ?
FC	- All legal entities except physical persons
FCF	- Non-commercial or non-profit organisations - International organisations (like CERN, ESA, EMBL) - Small or Medium-Sized Enterprises (SMEs)
AC	- Physical persons (only cost model open to physical persons) - Only non-commercial or non-profit organisations or international organisations not having an accounting system allowing them to distinguish the share of their direct and indirect costs

Each contractor shall apply the same cost reporting model in all contracts established under the Sixth Framework Programme. As a derogation to this principle:

- any legal entity which is eligible to opt for the AC model in a first contract can change to the FCF or the FC model in a later contract (except physical persons). If it does so, it must then use the new cost reporting model in subsequent contracts;
- any legal entity which is eligible to opt for the FCF model in a first contract can change to the FC model in a later contract. If it does so, it must then use the new cost reporting model in subsequent contracts.

Eligible costs

Eligible costs for FP6 contracts must be:

- actual, economic and necessary for the implementation of the project;
- determined in accordance with the usual accounting principles of the contractor;
- incurred during the duration of the project ;
- recorded in the accounts of the contractors (or third parties where third party resources have been agreed).

They exclude indirect taxes, interest, provisions for future losses or charges, exchange losses, costs related to other Community projects, return on capital, debt and debt service charges, excessive and reckless expenses and any cost which does not meet the criteria in the first four bullets.

28 RTD activities

RTD activities are all activities directly aimed at creating new knowledge. They form the core of the Integrated Projects and Specific Targeted Research Projects.

29 Demonstration activities

Integrated Projects may contain a demonstration component to prove the viability of new technologies that offer a potential economic advantage, but which cannot be commercialised directly (e.g. testing of product-like prototypes).

30 Innovation-related activities

Projects should include activities relating to the protection and dissemination of knowledge, and, when relevant, studies on the wider societal impact of that knowledge, activities to promote the exploitation of the results, and "take-up" actions. These activities are inter-related and should be conceived and implemented in a coherent way:

- **intellectual property protection:** protection of the knowledge resulting from the project (including patent searches, filing of patent (or other IPR) applications, etc.);
- **dissemination activities** beyond the consortium: publications, conferences, workshops and Web-based activities aiming at disseminating the knowledge and technology produced;
- **studies on socio-economic aspects:** assessment of the expected socio-economic impact of the knowledge and technology generated, as well as analysis of the factors that would influence their exploitation (e.g. standardisation, ethical and regulatory aspects, etc.);
- **activities promoting the exploitation of the results:** development of the plan for the use and dissemination of the knowledge produced, feasibility studies for the creation of spin-offs, etc, "take-up" activities to promote the early or broad application of state-of-the-art technologies. Take-up activities include the assessment, trial and validation of promising, but not fully established, technologies and solutions, easier access to and the transfer of best practices for the early use and exploitation of technologies. In particular, they will be expected to target SMEs.

31 Training activities

Integrated projects are likely to provide an excellent vehicle for the advanced **training of researchers and other key staff, research managers, industrial executives (in particular for SMEs), and potential users** of the knowledge produced within the project. Such training activities should contribute to the professional development of the persons concerned. The salary costs of those being trained are not eligible costs.

32 Consortium management activities

Projects will require particular attention by the consortium to overall management and coordination issues. Over and above the technical management of individual work packages, an appropriate management framework linking together all the project components and maintaining communications with the Commission will be needed. Depending on the size and scope of a project, a specially constituted management team with dedicated staff covering a range of skills may need to be set up.

Consortium management activities include:

- coordination of the technical activities of the project;
- the overall legal, contractual, ethical, financial and administrative management;
- coordination of knowledge management;
- overseeing the promotion of gender equality in the project;
- overseeing science and society issues related to the research activities conducted within the project;
- obtaining audit certificates by each of the participants;
- implementation of competitive calls by the consortium for the participation of new participants, in accordance with the provisions of the contract;
- maintenance of the consortium agreement;
- obtaining any financial security such as bank guarantees when requested by the Commission.

33 (Sub-)Total

As you are a solo participant, insert figures in the total row identical to your figures as Partner no. 1

Annex 2 – Proposal Part B

INSTRUCTIONS FOR PREPARING PART B OF A PROPOSAL FOR INCLUSION AS AN ADDITIONAL PARTNER IN AN INTEGRATED PROJECT IN THE SIXTH FRAMEWORK PROGRAMME.

Front page

Full title of the existing project you wish to join

Proposal abstract

copied from Part A (if not in English, include an English translation)

B.0 Tasks addressed

Indicate which task or tasks within the call this proposal addresses

(The call may be a multi-part call, with several different sets of tasks, in which case you must identify here which set of tasks your proposal is addressing. If this is not the case, then simply state here that you address all tasks in the call)

B.1 Outline implementation plan

Describe your proposed S&T approach, and show how this approach will enable you to achieve your objectives. Describe the overall implementation plan broken down to the level of activities and the components of each of the activities. Show how this plan integrates the various components to a coherent whole.

Then describe in detail as many of the following as are relevant to your proposal:

Research, technological development and innovation activities: Explain how the research/innovation effort of your work is comprised of a number of different components (major elements or blocks of work). Describe each of these components. Show the relevance and contribution of each to your work as a whole. The description of the innovation components should cover the plans for management of knowledge and of intellectual property; a description of the exploitation of results and a plan for disseminating of knowledge beyond the consortium.

Demonstration activities: Describe each of these components. Show the relevance and contribution of each to the research work elements of the project on which these demonstrations are fully or partly based. Show contingency planning for unexpected outcomes of the research work.

Training activities: Describe each of these components. Show the relevance and contribution of each to the project as a whole, and their role in disseminating information that will raise awareness of the scientific work being undertaken both inside and outside the project.

Consortium management activities: Describe each of these components. Show the relevance and contribution to the project overall management plans.

(Recommended length for the whole section B.1 – ten pages).

B.2 Description of the participant

Describe your organisation. Demonstrate that you are capable of achieving the objectives, and how you are suited and are committed to the tasks which will be assigned to you. Show complementarity between yourself and the existing participants. (Recommended length – five pages)

Other countries: If you are based outside of the EU Member and Associated states, explain in terms of the project's objectives why you should be included, describe the level of importance of your contribution to the project and the unique skills or qualities which you bring from outside the EU/AS. (Recommended length –one page).

B.3 Project resources

IP Project Effort Form. Complete an IP Project Effort Form (given below) to show your person-months associated with each activity identified in the sections above (As a solo participant, you complete the column for “Participant no. 1” and then insert identical figures in the column “Total participants”).

IP management level justification of resources and budget. Describe the resources needed to carry out the work (personnel, equipment, finance...). Demonstrate how you will mobilise the critical mass of resources necessary for success; show how the resources will be integrated to form a coherent whole, and show that the your financial plan for your contribution to the project is adequate. (Recommended length –three pages).

B.4 Other issues

If relevant to your work package, show how you will contribute to the project's efforts to engage with actors beyond the research community, to help spread awareness and knowledge and to explore wider societal implications. If relevant set out synergies with education at all levels. If there are gender issues associated with the work package, show how they have been adequately taken into account. Please also be aware that you will be required to contribute to the Gender Action Plan of the project/network (eg. provision of sex-disaggregated work force statistics).

If there are ethical issues associated with your activities within the network, show how they have been taken into account - indicate which national and international regulations are applicable and explain how they will be respected. Explore potential ethical aspects of the implementation of network results. In all cases include the Ethical issues checklist given below.

IP Project Effort Form

Ethical issues checklist

Table A. Proposers are requested to fill in the following table

Does your proposed research raise sensitive ethical questions related to:	YES	NO
Human beings		
Human biological samples		
Personal data (whether identified by name or not)		
Genetic information		
Animals		

If you answer “YES” to any of the above, please include in your proposal section B.4 the more detailed version of Table A (“Crucial information”) obtained from:

http://europa.eu.int/comm/research/science-society/ethics/rules_en.html

and also incorporate in section B.4 and in other appropriate parts of your proposal comments corresponding to the detailed instructions given in sections C-D at the above address

Table B. Proposers are requested to confirm that the proposed research does not involve:

Research activity aimed at human cloning for reproductive purposes,

Research activity intended to modify the genetic heritage of human beings which could make such changes heritable⁴

Research activity intended to create human embryos solely for the purpose of research or for the purpose of stem cell procurement, including by means of somatic cell nuclear transfer.

Confirmation : the proposed research involves none of the issues listed in Table B	YES	NO

Further information on ethics requirements and rules are given at the science and ethics website at http://europa.eu.int/comm/research/science-society/ethics/ethics_en.html

⁴ Research relating to cancer treatment of the gonads can be financed

Annex 3 – Evaluation forms

Individual Assessment Report for an Integrated Project

Proposal id :

1 – poor: 2 – fair: 3 – good: 4 - very good: 5 – excellent

0 -the proposal fails to address the issue/cannot be judged against the criterion due to missing or incomplete information

Half marks may be given

1. S&T excellence (Threshold 4/5)	Mark:
2. Quality of the proposer (Threshold 3/5)	Mark:

3. Mobilisation of the resources <i>(Threshold 3/5)</i>	Mark:
Overall score <i>(Threshold 12.5/15)</i>	Mark:

I declare that, to the best of my knowledge, I have no direct or indirect conflict of interest in the evaluation of this proposal
